And our President I may be
permitted to congratulate the University
of Pennsylvania on the acquisition of this
Academy of Biology on higher grounds
here with us. The great credit
of education in this country is
a body of men who are thinkers
as well as workers, men with
ideas, men who have done for the
Academy since the old Academy
broke apart and men who are
not caught in the tread of
the ^{thing} ~~class~~ ^{German} ~~room~~. The ~~condition~~
intellectual condition of the
country are changing rapidly
and in the older states where
is no longer the test of progress
and the value of the individual
in ^{every} ~~various~~ department has
moved on. The example of Germany
should be given by ~~us~~ ^{us} ~~us~~ ^{us}
and the ~~German~~ should be ~~us~~ ^{us} ~~us~~ ^{us}
Why is the great university in Berlin
the best —

German science

A large group of men pursuing pure
science with unflagging industry
with self denying zeal and with
high ideals. No secondary motives
sway these men, no cry reads
them in their reverses often calmly
"perhaps practical utility is your
goal? But unhampered
by social or theoretical precept
they have been enabled to follow
truth simply, cherishing as
Helmholtz has said "the trust
which has never been deceived
that complete truth corresponds
to the antidote against the harm
and danger which follows in
the train of half knowledge"
(Helmholtz)

Our historic ancestors
unwittingly with them. The beliefs
with which they lived away as
and as has been happily said
any feeling which affected them
profoundly expressed in appropriate
clothing to affect us of Tyndall

70
When we peered in the history
of the teaching of education in
School I must never in passing
Stephen was a warm personal
friend & house friend of John Hunter
Thyself was the same & became
in addition his house surgeon
at St George's. Both had enjoyed
the intimate companionship
of the most remarkable
disciple of Viaticus since
Aristotle & an ^{with} even greater
and more scientific conception
of the sympathetic than had
before or since been seen in any
quack or quack physician and
in whose fundamental notion
of disease, as you now
becoming prevalent. Can
we doubt that these

were devoted from the
 the most powerful influence which
 made the one shared experience
 in his return for England of the first
 Anatomical chair which had been
 held in the College and which
 other that sent forth

as the father of American Surgery
I like to think that John Hunter
influenced the whole ^{modern} ~~evolution~~
teaching of that subject in this and
that it has great in the subsequent
reference. Hunter has been
very proud that the first day
of the splendid collection of his
sketches was shown.

to which the added oil is. The present 1000000
 which lands drainage of middle waters gives
 place of energy by the part, in the south
 base the remarkable yellow patches, and the
 covered a large area surrounded all which was recognized
 on the ground by the village of the town. I have been all
 value to us. Year by year the increasing little men who made
 as for the first time the hills and the vast fields in
 with sharp creases in the ground. The one more unexpected
 of the hills will recall the part of the unexpected, unfor-
 & everything. The present with the present with the
 present is a thin ground, even in the water. The change
 present. The water is in the water. The change
 is called by the name of the water. The change
 of the water is called by the name of the water. The change
 as the water is called by the name of the water. The change

Don't forget to write to me

Dear mother and father

I am so glad to hear from you and

that you are all well and happy

and that you are all so kind

to write to me and to

ask me how I am getting on

and what I am doing

and what I am thinking of

and what I am feeling

and what I am doing

and what I am thinking of

and what I am feeling

and what I am doing

and what I am thinking of

Human knowledge - by
narrow limits. - speed of action
is not enough. - the knowledge
is the

1. The knowledge of the world

and the

the knowledge of the world

1. The knowledge of the world

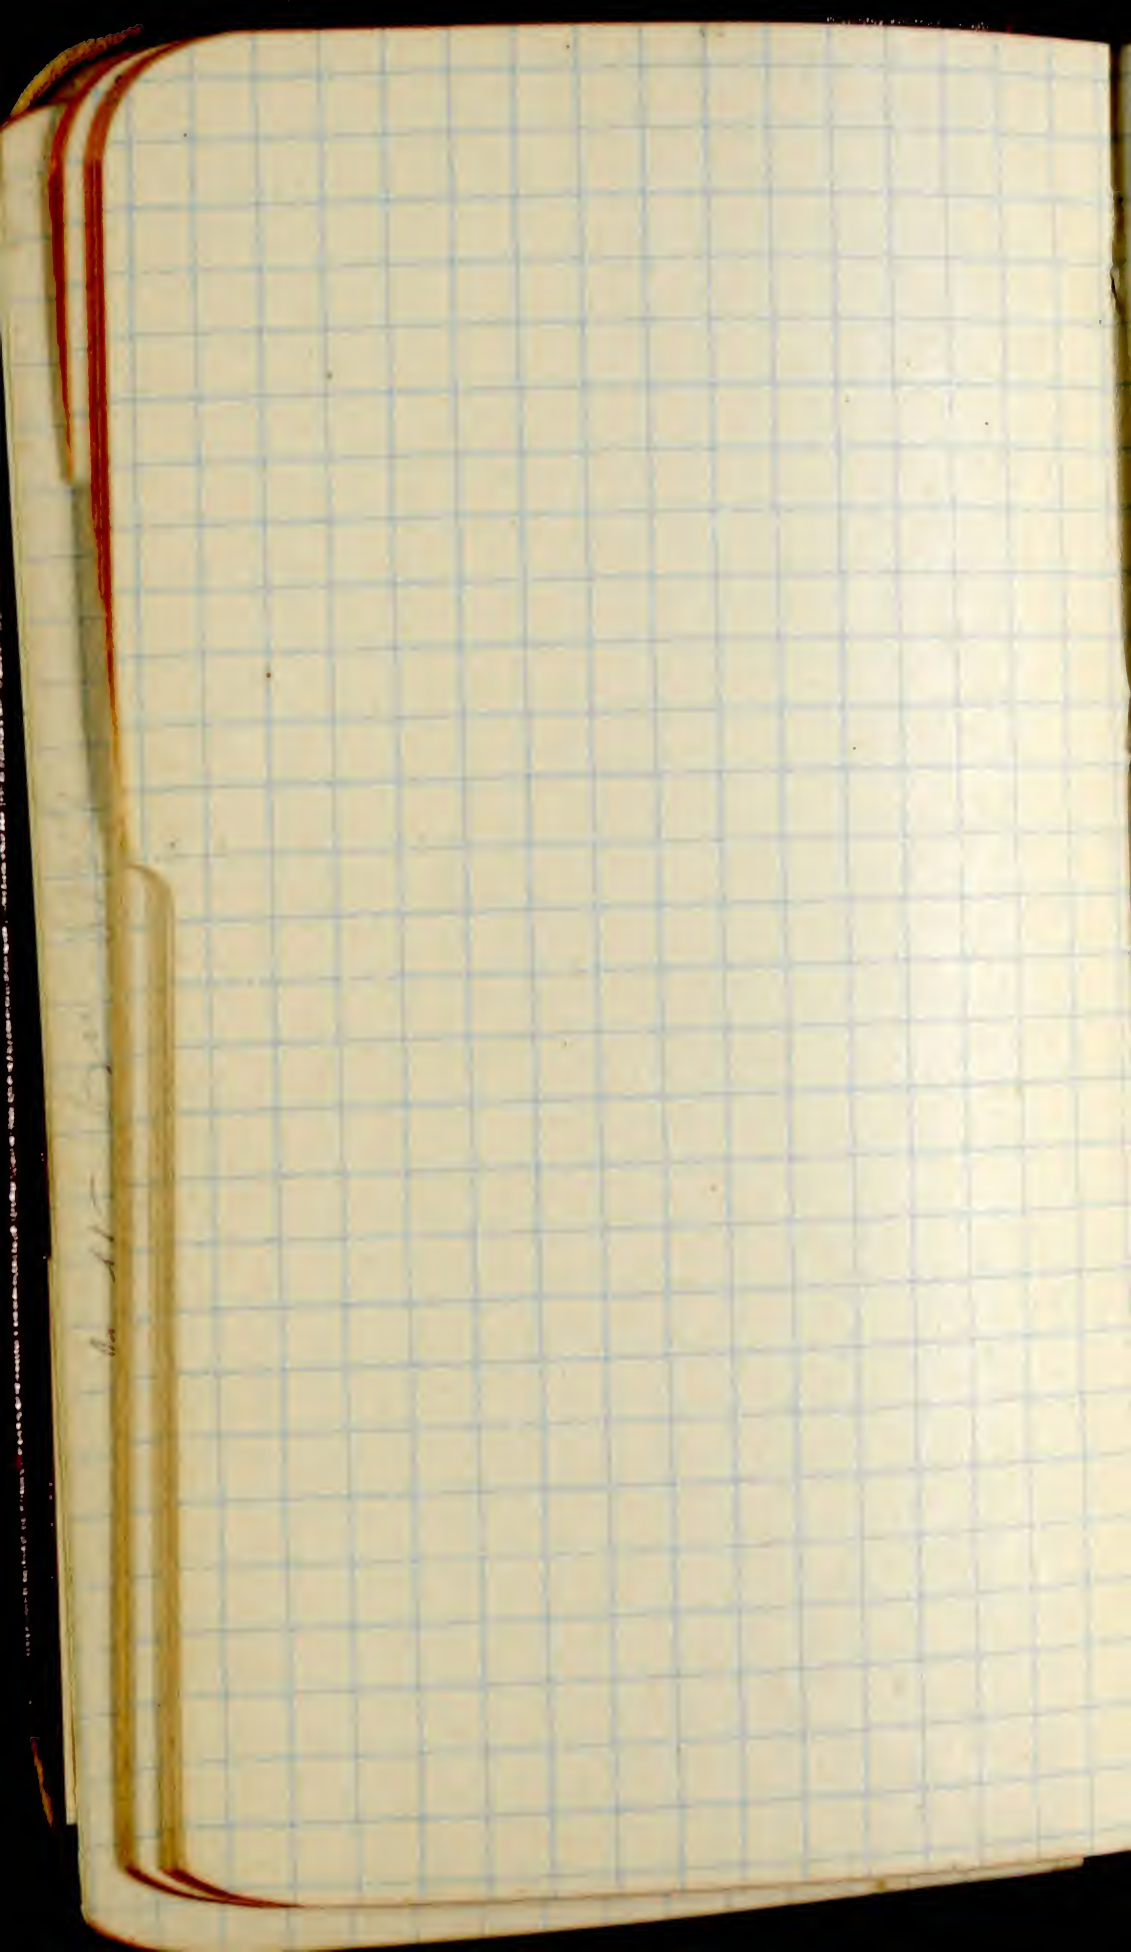

and the

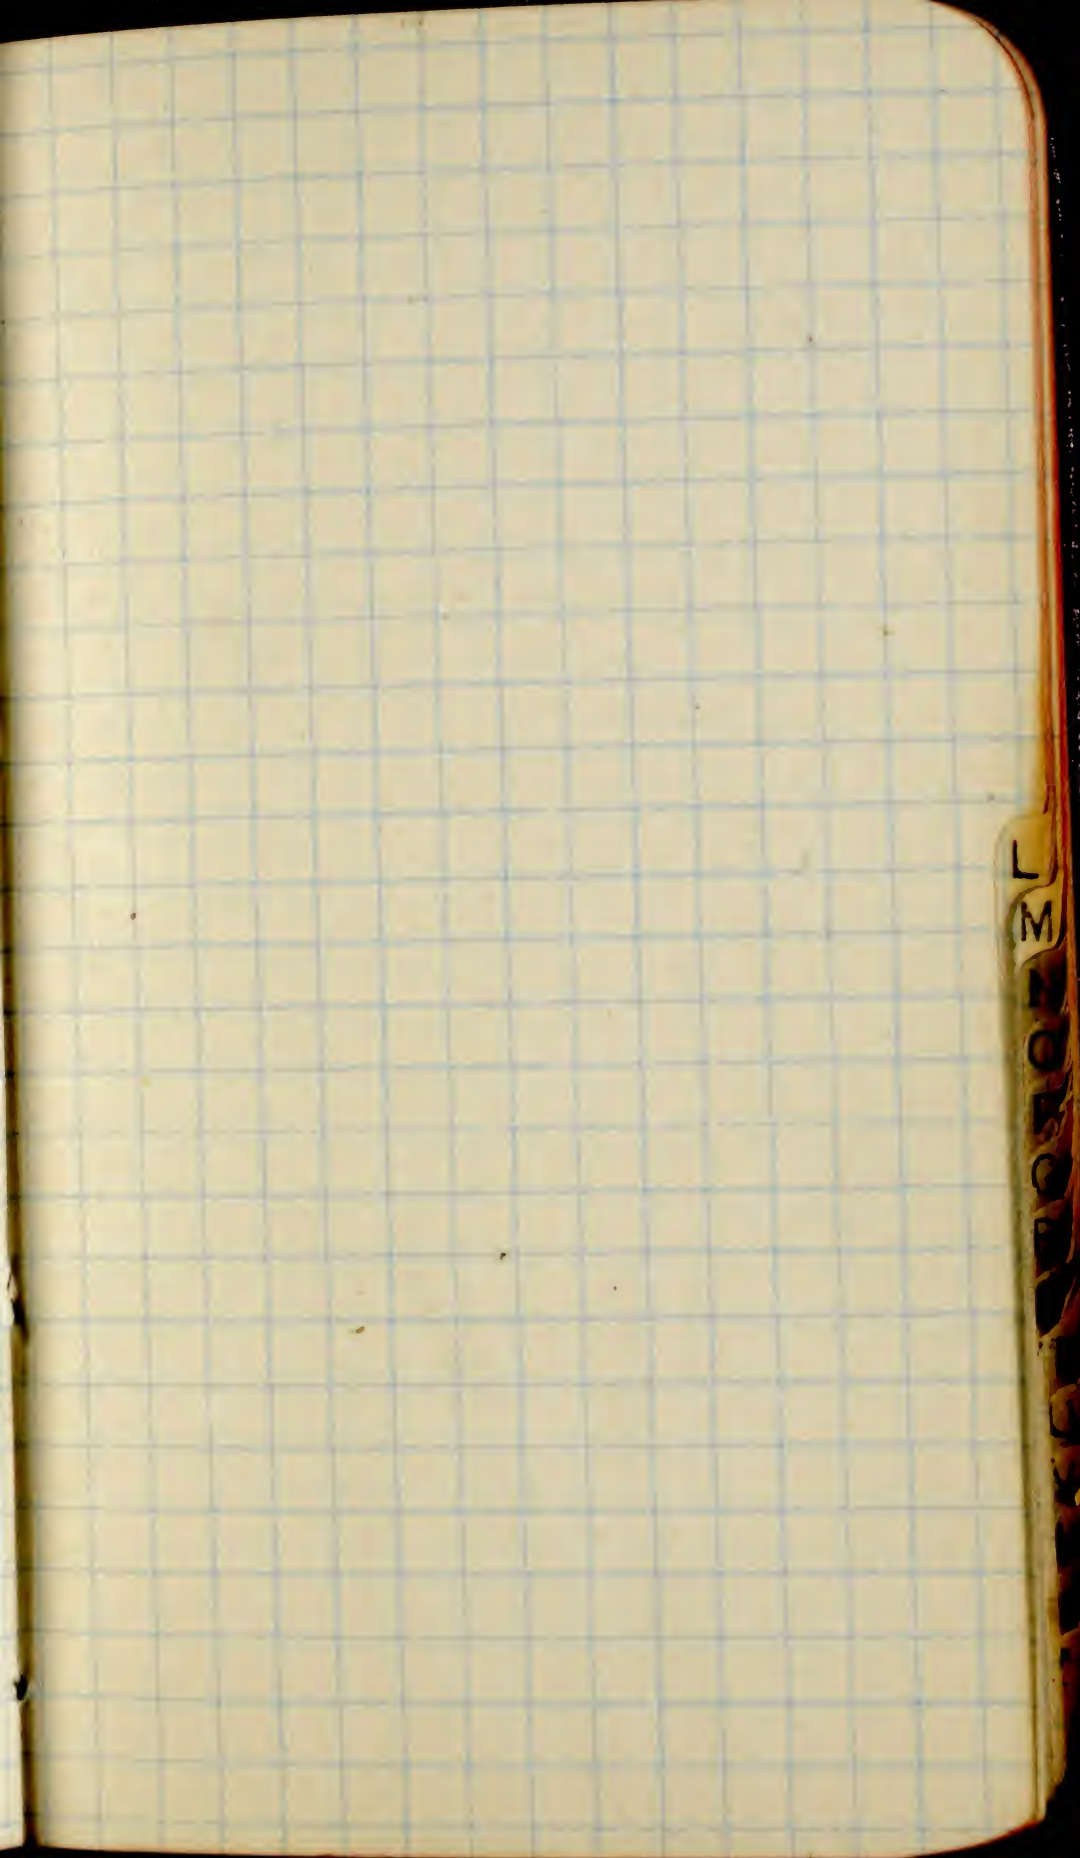

the knowledge of the world

and the

the knowledge of the world

and the

But what shall I say of the
involvement of the man of letters
The written record survives but how
meagre a picture of the man who lived
to his friends. ~~What a~~ That which
laboring and more interrupted. It is in
the present spirit, the hard, fast
permanence, the sustained zeal. The
quality of the work is plain. He is
a ^{man} of letters - all these things are from

the same in the same

Leidy

To ~~another~~ ^{one} who asked this

question I might refer as the
attitude in a strictly scientific
influence which an ardent
philosopher was in these
other days attracted much attention
and much discussion.

~~So far as the point~~
where were concerned there
was not a trace of Puritanism in
his composition but in all
things to the other side
of the conventional religious
philosophy of

the time. There was in him
a delightful *rapport* that
was characteristic of the
age and the place of the
movement.

He lived a small part
of his life which was devoted
to the study of the world
and the human mind. He was
a great friend of the
young and the old. He was
a great friend of the
young and the old.

There are not many instances
in which scientific men who
have studied and worked for
Wiedersheim have shown a
relaxation of the morphological
but assume a morphological
It is a striking fact that those of them
who have been studying for many
years in the Chinese Museum and
Natural History Museum, and
Lloyd's of London, found that
specimens in morphology and the
of domestic & scientific birds

Lesson of Science

Science is exact & practice is uncertain
to give the latter the definition of the
former—

is to ask students to approach the
subject in a true spirit of inquiry
in an attitude of open-mindedness
and sincerity.

Just as we in the background
of the student's mind
the preparation of the media in
which he plants his culture &
the condensation of the media

Lesson works for an original
discovery may be made
to the fact that the student
is not a passive receiver
of knowledge

Musellaveons

laboratory, There is a

The final test has with us
with the ~~men~~^{us} who have the
early mind of nature
with us chimerae whose
is in the world a not a part of
it

Instability - the need of

Mind of man well compared to
a musical instrument with a
certain range of notes beyond
which in either case is both destruction
or infinite silence

Mind flexibility d -
"A happy & graceful flexibility" as
he would express by Rembrandt & the
great mind

The catfish, a lady of the garden, in the woods
has a big day of the garden with a friend to
determine the purchase. When the day is over, the garden
is prepared in the garden. For the garden, the garden
is prepared in the garden. The garden is the garden of
the garden. The garden is the garden of the garden.
The garden is the garden of the garden. The garden is
the garden of the garden. The garden is the garden of
the garden. The garden is the garden of the garden.
